Physical behaviours

Physical behaviours include actions that can be observed and measured. These behaviours are often linked to mental health issues and can be a sign of distress. Examples of physical behaviours include self-harm, substance use, and changes in eating or sleeping patterns. It is important to recognize these signs and seek help if you or someone you know is experiencing them.

Verbal behaviours

Verbal behaviours include actions that can be heard and recorded. These behaviours are often linked to mental health issues and can be a sign of distress. Examples of verbal behaviours include threats of self-harm or harm to others, and changes in speech patterns. It is important to recognize these signs and seek help if you or someone you know is experiencing them.

Technology behaviours

Technology behaviours include actions that involve the use of technology. These behaviours are often linked to mental health issues and can be a sign of distress. Examples of technology behaviours include excessive use of social media, and changes in online activity. It is important to recognize these signs and seek help if you or someone you know is experiencing them.

Drug and alcohol behaviours

Drug and alcohol behaviours include actions that involve the use of substances. These behaviours are often linked to mental health issues and can be a sign of distress. Examples of drug and alcohol behaviours include excessive use of substances, and changes in behaviour. It is important to recognize these signs and seek help if you or someone you know is experiencing them.
